PARTICIPANTS' FEEDBACK

Trainees at United States Pharmacopeia Facility, India

Prof. Andy Barraclough interacting with Trainees

Prof. Paul Lalvani addressing the participants

Participants at SK Logistics (ISO Distribution Facility), India

"This course was one of its kind in my career and hopefully will add value to my management and leadership skills in South Sudan. I have learnt a lot and now I am able to deliver and ensure that the people of my country have access to quality, safe and effective health product."

Dr. Moses Deng Dhol,
Director General, Ministry of Health,
South Sudan

"Empower's training on promoting access to medicine was a comprehensive training package enabling the staff responsible for PSM of medicines and medical equipment by building capacity in procurement and access to medicines. It was an excellent training and the choice of training venue gave us the opportunity to understand the functioning of various UN agencies based in Geneva."

Kyaw Kan Kaung,
Director (Procurement and Supply),
Ministry of Health, Myanmar

"I found the course to be an eye opener. Very impressive and well-designed specially in my field of work. I truly enjoyed the quality of presentation, discussion and the exposure during the site visits at USP and Aurobindo Pharma."

Sabah Suliman Abdelgadir,
Procurement Officer, National Medicine
Supplies Fund, Sudan

"This has been a highly informative week. The practical exercise and site visits were essential to 'bringing it all together'. Thank you for excellent quality professors and team."

Justina Ogechi Ehirim,
Procurement Officer, WHO, South-East
Asia Regional Office

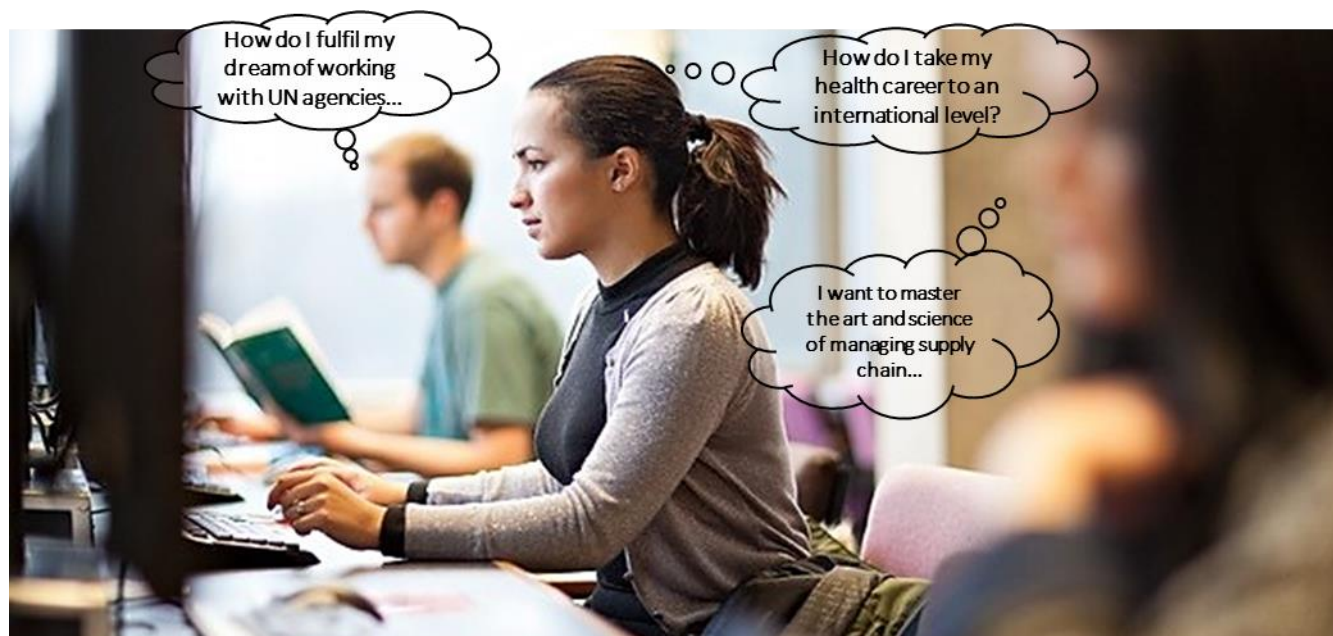

"Feeling quite empowered, the manufacturing facilities and the quality control and assurance laboratory tour at USP have expanded my scope of understanding as a pharmaceutical professional. It is my wish that everyone in the industry should acquire this knowledge for the betterment of Public Health."

Tirivashoma Dube,
District Pharmacist, Ministry of Health,
Zimbabwe

ONLINE POST-GRADUATE DIPLOMA COURSE

POST-GRADUATE DIPLOMA COURSE IN GLOBAL HEALTH PROCUREMENT & SUPPLY CHAIN MANAGEMENT

Empower School of Health, accredited by The Chartered Institute of Logistics and Transport, India, offers an Online Post Graduate Diploma in Global Health Procurement and Supply Chain Management (PSCM).

Capacity building in PSM is one of the thrust areas of programming for profitability in public health and is an enabler for an organization to achieve its objectives in the context of logistics and supply chain dependencies. It also helps resolve supply chain issues in multiple programs. Our course vastly enhances participants' abilities and effectiveness to work as professionals in the field of PSM.

About the Course

- 11-month self-paced online learning programme covering 9 Modules of PSCM –
Fundamentals of Health Supply Chain | Product Selection | Quantification | Procurement | Inventory Management | Storage & Distribution | Quality Assurance | Organisation and Staffing | Leadership in Global Health
- Faculty with rich Global Health experience
- Blended training approach with the extensive use of exercises, case studies and projects

For more details on the course, please email us at – info@empowerschoolofhealth.org

(Scholarships and installment options available)

SCHOOL OF HEALTH

ONLINE CERTIFICATE COURSES

Empower announces **Online Certificate Courses** for you to excel as a Procurement/ Supply Chain Professional in Public Health.

Duration: 2 months

Modality: Self-paced Online Programmes

Course Fees: USD 300 – 400

Global Health Leadership

Being a leader of a Global Health programme or institution exposes you to several issues and challenges –In this course, we discuss case studies with insights from various countries, analyse their successful tackling of global health issues, and empower you with a holistic understanding to accelerate the global health agenda to greater heights.

Introduction to Procurement Cycle in Public Health

Learn about what factors influence prices, What the different procurement methods are, What Good Pharmaceutical Procurement is, Which methodologies are used in Supplier selection, How Financial Sustainability is achieved in Procurement, and How is Procurement Assessment carried out.

Managing Storage & Distribution of Public Health Products

This practical and highly useful course includes topics such as Goals of Storage and Distribution, What the Distribution Cycle is constituted of. We simplify your understanding of how complex Distribution System Design is done, What Good Storage Practices are, How Resources and Cost Analysis is carried out, and how Improvements and Replacements are considered.

Quantification & Forecasting in Public Health

Understand the fascinating science behind the methodology, tools and key process used to estimate your country's needs for health commodities. We discuss the consumption method, morbidity method and proxy consumption method, and how they apply to different product categories and contexts.

Promoting Effective Use of Medicines in Public Health Programmes

This course is about internalising the importance of rational, judicious and effective use of medicines – a key concept for the success of any public health programme. We discuss aspects such as Adverse Impact of Irrational Medicine Use, Factors Underlying Irrational Use, Strategies to Improve Medicine Use, Developing A Strategy, Promoting Treatment Adherence, Why Pharmacovigilance Is Important.

Product Selection and Technical Specifications for Public Health in PSM

In this module students will develop a basic understanding of health commodities, review how products on the national treatment guidelines is arrived at including the process, persons involved, key strengths and gaps. A detailed understanding of the essential medicines concept will be explored.
